practicable route for a Ship Canal across the Nicaragua allowed by it to fall into British ossession (being seized under the pretense that it rightfully belonged to the Mosquito proclaimed herself)—that after that disaster the Nicaragua Secretary of State again addressed our Government in the most moving terms, asking its interposition with Great Britain to induce her to surrender the captured port, so vitally necessary to Nicaragua, but which that feeble State dared not attempt to recapture from the formidable power of England—but that to all these representations, and appeals, and entreaties, backed by personal application to our Government through an accredited Minister, no response was made by the late Executive no remonstrance ventured with Great Britain, not even the cold civility of a reply was vouchsafed to the distressed, aggrieved Government and People of Nicaragua.

Are these facts, or are they not? The silence of the Opposition journals answers conclusively. What we stated was true,

Can there be a sane man so blinded by Monroe doctrine that the United States would not consent to further appropriations and colonizations of the American Continent by European powers? Surely, surely, if the silence preserved and indifference the San Juan by Great Britain are consistent with the maintenance of the Monroe doctrine, then it would be difficult to imagine any conduct on the part of an Administration which would not be consistent with that doctrine.

Mr. Hath rejoined, saying that the Senator from New York had only convinced him of the propriety of adopting the amendment. The mighty intellects of the great men of the Senate were at this very time engaged in efforts to get rid of the black subject, and if that object could be accomplished, according to the suggestion of the Senator, by substituting another color, it certainly ought to be done. The amendment was adopted.

Several other amendments were made.

Mr. Rusk offered an amendment, providing for a considerable increase of Clerks in the Post Office Department. In the course of some remarks upon this amendment, Mr. R. stated that he designed bringing forward at this Session a bill which should make it obligatory on the Postmaster General to increase the mail facilities in the newly-opened pertion of the country, and not making such increase dependent upon his discretion. He also stated that the increased force was necessary for the carrying out of foreign postal arrangements.

After a long debate the amendment was adopted. Several other amendments were adopted, and at 4 o clock, without having concluded action on the bill, the Sentte adjourned.

13 The Original and only Genuine Wistar's Baisana of Wild Cherry, was introduced in the year 1858, and has been well tested in all the complaints for which it is recommended. For ten years it has proved more efficacious as a remedy for cought, colds, inducens, broachitis, aschma and consumption, in its incipient stages, then any other medicine.

more efficacions as a remedy for coughs, colds, influenza, broughtills, asthma and consumption, in its incipient stages, then any other medicine.

What time establishes and consecrates, what experience adopts and confirms, what all men in all places unite in saying is good and valuable, is so no doubt. A popularity of this sortifices in society in roots so deep and so strong, that time cannot destroy it. The success which has attended the medicine for several years past, has overcome the prejudices of all responsible men, and the article has taken a send among the first class of discoveries and blessings of the age; and when resorted to in season, cradicates the disease for which it is recommended.

It is perhaps but an act of justice to the proprietors of Wistian's Bansan of Wild Cherry for us to say that our personal experience in the use of this article has impressed us most favorably. One of the proprietors of the Traveller was entirely cured of a severa cough of four months' continuance, by the use of the Baisan; and several of our friends and acquaintance, who have tried the article, have fixed the faceled.
